Parish EOC's

Weather Situation:

Sunny

Gage Readings: (Note: FS= Flood Stage):

(Gage readings obtained from www.rivergages.com)

Gage at: Carrollton (FS: 17') **16.41'**

Condition of Levee District FCWs and Resources:

All MRL floodgates are currently open.

Needs that may be requested from USACE, CPRA, or GOHSEP

SLFPA-W will seek recommendation where necessary from USACE, and CPRA regarding any issue(s) throughout our area of jurisdiction.

Actions Currently Implemented – Including flood fight measures, any and all repairs, supplies (dirt, sandbags, rock, sandboils, P/S seepage observed, scouring, etc...) equipment, pumps.

Increased monitoring of fleeting operations has begun. **Barges are to be 180' from the levee centerline or 100' from the original floodside levee toe (which is under water at this time) or whichever is greater--** CONTACT USCG AT 504-365-2200 and press "0" (USCG Command Center) to report any barges and/or ships that you deem in violation of this safety precaution.

The Mississippi River is cresting in the New Orleans area according to NOAA and it should begin to drop within the next week. Seepages and other hazards will be monitored closely as the river falls and any change in patrol schedule will be reported. Currently, 24 hour patrols are ongoing. Many areas of the system have water on the flood side toe or levee slope. Following are issues that were encountered during today's inspection as well as outstanding issues as conveyed from USACE.

No new issues affecting system performance were noted during today's inspections.

Multiple potential seepage areas are being monitored. Following is a listing of the stations we are monitoring.
